

COW DISEASE: Black Quarter (BQ)

Symptoms:

- Sudden lameness or stiffness in affected limb(s) , Rapid breathing and reluctance to move.
- Swelling in the muscles, especially around the shoulders, neck, chest.

Cause by:

- Bacteria: *Clostridium chauvoei* , Found in soil and intestines of cattle , spores are ingested and can activate after muscle injury.

Prevention Measures:

- Treat cuts and injuries promptly with antiseptics
- Rotate pastures to prevent soil spore accumulation

Ayurvedic solution:

- Make a

paste of garlic and

mustard oil

for external application on swelling.

- Use neem oil

or leaves for disinfection and wound cleaning.
